Local Host: César Montaña, PhD. Rector Universidad Andina-E

Oxford University Press: Sarah Humphreville, Editor

Series Editor: Nancy Krieger, PhD, Professor of Social

Epidemiology, Harvard T.H. Chan School of Public Health

"This brilliant book is a model of both translation and transformation. It presents decades of Latin American research to English speaking audiences...and demonstrates that producing emancipatory, path-breaking analysis requires confronting deeply-entrenched quantitative and qualitative reductionisms."

-Charles L. Briggs, PhD, Distinguished Professor, University of California, Berkeley

"Jaime Breilh is arguably the most creative and influential critical epidemiologist today...whose pathbreaking research studies challenge dominant conceptual and methodological paradigms of public health. Critical Epidemiology and the People's Health offers an illuminating and inspiring guide for our scientific work...for this transformative period of our planet's history."

-Howard Waitzkin, MD, PhD, Distinguished Professor Emeritus, University of New Mexico

"Jaime Breilh must be praised for calling attention to culture in disciplinary transformation by underscoring how the contribution of indigenous knowledge and thinking complements academic critical thinking...this book offers a timely and much needed intellectual breeze of fresh air for...years to come."

-Lisa N. Borrell, DDS, PhD, Distinguished Professor, Department of Epidemiology & Biostatistics, City University of New York Graduate School of Public Health & Health Policy
